

2010 2-Stroke Failure Analysis & Repair School At AERO RENTAL & SALES

The school is an excellent way to learn why 2 stroke engines fail and how to troubleshoot and repair them. Technicians will learn techniques to quickly diagnose and test broken equipment, along with recommendations for basic and preventative maintenance. The class will be taught by Brian Chick, the Service Manager, from Golden Eagle Distributing.

To Be Covered in the Class:

1. Failure Analysis
2. Basic & Preventative Maintenance
3. Equipment Repair & Testing
